

SafeGard® 76

SMS PROTECTIVE GARMENTS

SafeGard® 76 SMS Protective Garments from Lakeland Industries, Inc. are well named. They keep employees safe from numerous toxic particles and water-based liquids. SafeGard® 76 garments feature 3 tough layers to keep contaminants out.

The 2 outer layers are made with spunbonded filaments that stand up to tearing and abrasion. The inner layer is of melt-blown polypropylene microfibers that filter out potentially harmful particulates and liquids.

Breathability is the bonus; air and water vapor pass through for superior wearer comfort.

SafeGard® 76 protective garments are available in 57g/in² weight with a melt-blown middle layer. These garments are rugged, triple stitched with serged seams to save on renting, laundering and replacing cloth garments. Coveralls feature a deluxe pattern with 2 sewn pockets and elastic in the back.

Available in Sky Blue, too!
