

HYPER-LITE KNITS

**BUILT FOR THE
INDUSTRIAL ATHLETE**

HYPER-LITE | INHERENTLY FR | PERMANENT MOISTURE-WICKING

Welcome to the next evolution of moisture-wicking technology and all-day comfort. Hyper-lite design meets superior moisture management in one of the lightest and most effective performance fabrics on the market. Engineered with an optimal fiber blend, this fabric keeps the wearer cooler and drier – even under the blazing sun and high-intensity activity. Independent data confirms Hyper-lite knits wick moisture faster, and dries quicker than competitive garments -all while staying exceptionally soft and comfortable against the skin.

SUPERIOR THERMO-REGULATION

Lakeland's Hyper-lite garments are crafted with a 60/40 fiber blend that delivers superior moisture management. Data proves this blend wicks moisture faster and dries more quickly, keeping you:

- Cooler and drier in extreme heat
- Warmer in cold conditions
- Comfortable year-round

TESTED PERFORMANCE:

Lab and field data confirm this fabric exceeds industry standards in moisture wicking speed, drying rate, and breathability - all while maintaining long-term durability and softness.

BUILT TO LAST

Unlike other fabrics that rely on topical treatments for moisture-wicking (which wash out over time), Hyper-lite's performance is built into the fibers themselves—delivering long-lasting comfort and reliability that lasts the lifetime of the garment.

SPECIFICATIONS

Fabric: 5.7 oz inherently FR lightweight knit

ATPV: 9.0 cal/cm² **CAT:** 2

Sizes: SM-6XL

STYLES

Style Number	Description
HS57AT29RT	Men's hi-vis long sleeve knit henley
HS57AT13	Men's navy long sleeve knit henley
HS57AT06	Men's grey long sleeve knit henley
LSC57AT29RT	Men's hi-vis long sleeve knit crew
LSC57AT13	Men's navy long sleeve knit crew
LSC57AT06	Men's grey long sleeve knit crew
LSCW57AT13	Women's navy long sleeve knit crew
SSC57AT06	Men's grey short sleeve knit crew
△ SSC57AT29RT	Men's hi-vis short sleeve knit crew
SSC57AT13	Men's navy short sleeve knit crew

△ Short sleeve version meets ANSI 107 Class 2

9/30/25

FEATURES

- **Hyper-lite Weight Construction:** Among the lightest performance fabrics available on the market
- **Superior Moisture Management:** Engineered with an optimal fiber blend to wick moisture away from the skin rapidly and promote quick evaporation
- **Enhanced Breathability:** Increases airflow for improved temperature regulation during high-exertion tasks
- **Rapid Drying:** Dries significantly faster than competitive fabrics, minimizing discomfort and chafing
- **Exceptional Comfort:** Soft next-to-skin feel, even under prolonged wear
- **Fuze Technology:** Superior odor control - 100% sustainable and chemical free - lasts life of the garment - enhances dry time
- **UPF 50 Protection**
- **Flat Seam Construction and Athletic Cut for Increased Comfort**
- **Enhanced Breathability:** Superior airflow to allow for quicker drying times and thermo-regulation

THE RIGHT BLEND MATTERS

Not all moisture-wicking fabrics are equal. True performance needs a balance of hydrophobic and hydrophilic fibers for lasting moisture control. If the label says "100%" of one fiber, it's likely just a temporary treatment. Hyper-lite is built for superior wicking, durability, and performance.

Performance Benefits for Industrial Athletes:

- Maintains dryness and comfort in high-heat, high-exertion environments
- Reduces risk of overheating through efficient moisture and heat dispersion
- Lightweight feel improves range of motion and reduces fatigue
