

FIREFIGHTER GLOVES

ULTIMATE GLOW+ ILLUMINATED PBI® FIREFIGHTER GLOVES

Revolutionary knuckle design enhances dexterity, comfort, and fit, ensuring seamless manoeuvrability and control. Silicone coating boosts grip and abrasion resistance for unparalleled durability. Aramid knitted lining and Silicone-coated Kevlar knit palm with silicone coating provides exceptional durability and grip.

FEATURES

Revolutionary Photoluminescent Technology: Absorbing UV light by day and emitting a potent afterglow in low light with a 555-nanometer wavelength, these gloves offer unparalleled visibility for firefighters, enhancing situational awareness for swift, safe navigation in high-risk environments, penetrating smoke where traditional torches falter.

Advanced Grip and Abrasion Performance: The PBI® Flex 7™ is engineered to elevate your performance with increased grip and abrasion resistance, providing you with the confidence to tackle any task with precision and control.

CUFF OPTIONS

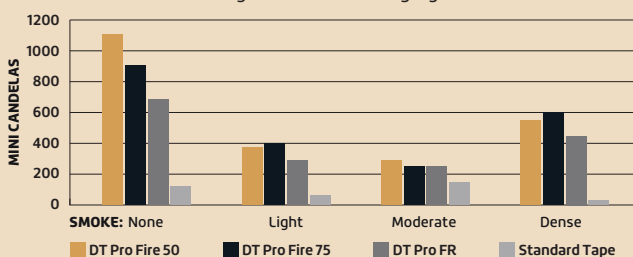

Open Gauntlet: Designed for enhanced fit, this option ensures a secure yet comfortable seal around your wrist, allowing for unrestricted movement and flexibility.

Knitted Wrist with Nomex® Cuff: Seamlessly integrating with fire suits, this cuff option provides a snug and secure fit, enhancing overall safety and protection in high-risk environments.

Long Gauntlet (Texas Style): Constructed from Nomex® fabric, this option is perfect for wearers requiring gloves over tunics, providing an additional layer of thermal protection and peace of mind.

GLow TAPE VISIBILITY

As tested in a dimly lit room with varying smoke levels

ET3200GP

COMPOSITION

Outershell Upper Material:
PBI® Flex 7™

Palm: Silicone-coated Kevlar®

SITUATIONAL AWARENESS

This product improves the situational awareness of the firefighter by creating a photoluminescent glow in smoke and low light conditions. The light emitted from these gloves has a nano wavelength of 555 which can be seen in smoke, where torches operate at a different wavelength and can't be seen. Disorientation is identified as one of firefighter's most serious hazards.
